Re: Form 471 Application Number: 18132
Funding Year: 1998
Billed Entity Number: 128260

We have completed our review of your FCC Form 471, Services Ordered and Certification Form, and made decisions with respect to your requests for discounts along with other applications received within the same time period. This letter is to advise you of our decisions.

As you may know, the Federal Communications Commission (FCC) in June 1998 made two changes to the Universal Service Fund for schools and libraries that have direct bearing on your discount request for 1998. First, the 1998 program year has been extended by six months, for a new ending date of June 30, 1999. Second, the FCC established new funding priorities whereby all eligible applicants will receive discounts for eligible telecommunications services and Internet access. Support for internal connections will be allocated in accordance with need so that schools and libraries will receive discounts in order of the discount percentages for which they qualify beginning with applications qualifying for the highest discount percentages. Discounts for internal connections will continue until all funds are exhausted. These changes are reflected in the information in this letter regarding your discount request.

On the following page(s) is a list, by row of Items 15 and 16 of your Form 471. For each item, there is a Funding Request Number (FRN) and several very important pieces of information relating to the disposition of that request. A complete explanation of each item begins below.

If you have any questions about our decisions on your discounts, you may send them in writing to the Schools and Libraries Division/USAC, Box 125 - Correspondence Unit, 100 South Jefferson Road, Whippany, NJ 07981.

Your next step in the discounting process is to complete and submit the FCC Form 486 enclosed with this letter to notify the SLD that you are currently receiving or have already begun to receive services for which discounts have been approved. This will enable your service providers to invoice SLD for your discounts. Please note that we are notifying each service provider listed on your Form 471 of our decision on your discount request. In addition, you should contact each service provider yourself to make any necessary arrangements regarding start of services, billing of discounts, and any other administrative details relevant to your participation in the Universal Service Fund. For important information about your Form 486, see next page.

FCC Form 471 Applicants who are approved for discount eligibility are reminded that they continue to be subject to audits and other reviews that the SLD may undertake to assure that discounted services are being used in compliance with program rules. If the SLD discovers that discounted services are not being used in compliance with program rules, 471 Applicants will be subject to enforcement activities and other means of recourse by the SLD and other appropriate Federal, state, and local authorities.

Explanation of Information Provided in SLD Funding Notification

On the following pages we provide you with a synopsis of the discount eligibility decision for each item you requested. To help understand this synopsis the following definitions are provided:

- * **Funding Request Number (FRN):** A number assigned by the SLD that will identify a Funding Request. A Funding Request is a single row of item 15 or 16.
- * **Funding Status:** An item may be "Funded," "Denied," "Partially Funded," or not approved because of "Funds Exhausted." An item that is "Funded" will be approved at the level that SLD determines is appropriate for that item. That will generally be the level requested by the Applicant unless the SLD determines during the application review process that some adjustment is appropriate, for example, a different discount percentage for that item than the FCC Form 471 featured. If an item is "Denied," that denial will be briefly explained in the "Funding Commitment Decision," and amplification of that explanation may be offered in the section, "Funding Commitment Decision Explanation." An item will be "Partially Funded" or "Unfunded," in accordance with FCC program rules, if the total amount of funds in the Universal Service Fund is insufficient to fully fund all approved requests. If the Form 471 was received after all the funds in the Universal Service Fund were allocated and it was processed, the status will indicate "Unfunded - Funds Exhausted."

- * SPIN (Service Provider Identification Number): A unique number assigned to each service provider by the Universal Service Administrative Company (USAC).
- * Service Provider Name: The legal name of the service provider.
- * Provider Contract Number: The number of the contract between the eligible party and the service provider. This will be present only if a contract number was provided on Form 471.
- * Services Ordered: The type of service ordered from the service provider, as shown on Form 471.
- * Earliest Possible Effective Date of Discount: The first possible date of service for which the SLD will reimburse the service provider for discounted services. Note: If the actual service start date provided on a Form 486 is later than this date, the actual service start date set forth in the Form 486 will be the effective date of the discount.
- * Contract Expiration Date: The date the contract expires. This will be present only if a contract expiration date was provided on Form 471.
- * Estimated Total Annual Pre-discount Cost: Amount in Column 10 of Item 15/16, Form 471 as determined through the application review process, PLUS an automatic extension of monthly costs for Telecommunications Services and Internet Access through June 30, 1999. Please note that, during the Problem Resolution process at SLD, the amount in Col. 10 of Item 15/16 may have been corrected to conform to the information provided about Service Start Date and Monthly Costs.
- * Discount Percentage Approved by SLD: This is the discount rate that the SLD has approved for this service.
- * Funding Commitment Decision: This represents the total amount of funding that the SLD is now reserving to reimburse service providers for the cost of the discount for this service. This figure may be different from the Estimated Total Annual Pre-Discount Cost (Col. 10 of Item 15/16) times the Percentage Discount (Col. 11 of Item 15/16) in your application. It may be higher because of the addition of the monthly cost for Telecommunications Services and Internet Access for the six months from January 1, 1999, through June 30, 1999. It may be lower because of an adjustment determined appropriate by the SLD, such as of the discount percentage, or a denial of discounts and, if so, the accompanying comment will explain this difference. The difference may also reflect a reduction from the request level made necessary by overall funding limitations, in which case the "Funding Status" above will indicate "Partially Funded" or "Unfunded." Whatever amount is listed here, it is important that you and your service provider both recognize that the SLD should be invoiced and the SLD may direct disbursement of discounts on only eligible, approved services actually rendered.
- * Funding Commitment Decision Explanation: This entry may appear to amplify the comment in the "Funding Commitment Decision," if the discount request for this service is denied for reasons other than "Unfunded" or if the SLD determined that some adjustment to the request level was appropriate.

Using the Enclosed FCC Form 486 and Invoice

FCC Form 486: You will use this form to notify the SLD that you are now receiving or have already received services for which discounts have been approved. Your completed Form 486 allows us to begin processing invoices from your service providers for your discounts. It also sets in motion the process by which you and your service provider can invoice SLD for approved services you have already paid for.

Each Billed Entity Applicant must file a separate Form 486, although each Billed Entity's Form 486 may include services from multiple Forms 471 if the same Billed Entity Number is listed on the various Funding Commitment Decision letters that you receive. When completing your Form 486, please be certain to use the Billed Entity Number as listed at the beginning of this Funding Commitment letter. (We may have revised or corrected the Billed Entity Number from your original Form 471, so please use the number exactly as it is listed in this letter.)

To assist in completing your Form 486, we have pre-printed your Block 1 information, including the Billed Entity Number. Please review the pre-printed information. If you believe there is an error in the pre-printed information -except for the Billed Entity Number-please cross off and print the correct information above each item. Then make multiple copies of this Billed Entity -specific Form 486 for future use, and follow the instructions with the form to complete and submit it to SLD.

Billed Entity Applicant Reimbursement Form: If you have already paid in full for services for which you are now being approved for discounts, you can use the enclosed Billed Entity Applicant Reimbursement Form to seek reimbursement from your service provider. This Form is not for use by service providers, who have their own invoice form. If you plan to submit a Billed Entity Applicant Reimbursement Form, please read and follow the instructions carefully regarding the Form as well as the Form 486 to avoid delay in processing your reimbursement.

SLD Funding Notification Synopsis for Application Number: 00013130

Funding Request Number:00030708 Funding Status: Unfunded or Denied
SPIN: 143008159 Service Provider Name: Education Networks of America, LLC
Provider Contract Number: FA-99-12803-00
Services Ordered: Internet Access
Effective Date of Discount: 07/01/1998 Contract Expiration Date: 12/31/2001
Estimated Total Annual Pre-discount Cost: \$1,747,000.00
Discount Percentage Approved by SLD: N/A
Funding Commitment Decision: \$0.00 - Invalid eff. date of service
Funding Commitment Decision Explanation: The dollars requested were for
service(s)/
product(s) delivered outside of the current funding year.

Connections less than 70% discount to be funded.

**Form 471 Application of Tennessee Department of Education
Application Number 18132
Fund Administrator's Explanation of Funding Commitment Decisions
February 25, 1999**

Introduction

On April 3, 1998, the Integrated Systems and Internet Solutions, Inc. ("ISIS 2000" or "Protestant") submitted to the fund administrator an "Objection to Application and Request for Expedited Relief." The Objection was filed in response to the TNDOE's announced intent to award a contract in the amount of \$74,352,941 to Education Networks of America ("ENA") to be paid over a three and one half year period. According to ISIS 2000, the Department planned to seek universal service support from the Universal Service Support Mechanism for Schools and Libraries for the services to be provided by ENA. As the unsuccessful bidder for the contract, ISIS 2000 challenged the eligibility of certain service components of the ENA contract in a total amount of \$13,148,000. ISIS 2000 stated that it submitted its Objection to the fund administrator "insofar as the matters raised herein pertain to processing of the Department's application." *Objection of Integrated Systems and Internet Solutions, Inc.*, p. 1 n. 1 (April 3, 1998).

The Schools and Libraries Division (SLD) of the Universal Service Administrative Company (USAC) has reviewed Application Number 18132 filed by the Tennessee Department of Education (TNDOE or Department). This Application requests discounts on services contracted with the Education Networks of America (ENA). The services are described as Internet access services to Tennessee schools. This application was filed on April 15, 1998.

This *Explanation of Funding Commitment Decisions* is being provided to supplement the Funding Commitment Decisions Letter being issued to the Department in response to Application Number 18132.¹ The fund administrator considered the following issues in addition to reviewing this application in accordance with its program integrity assurance procedures.

¹ Also on April 15, 1998, the Department submitted two other, separate Form 471 applications to the fund administrator, Application Number 34467 and 43743. The applications seek discounts on existing contracts. 47 C.F.R. Section 54.511(c)(1). ISIS 2000 did not challenge these applications for discounts.

ISSUES CONSIDERED BY THE FUND ADMINISTRATOR

1. Does the ENA bid constitute the most cost effective bid?

Description of Issue and Reference to Pertinent Rules

ISIS 2000 contends that the ENA bid is not the most cost effective bid. *Objection to Application and Request for Expedited Declaratory Ruling*, pp. 6-12 (April 3, 1998).

The program rules require that in selecting a provider of eligible services, entities shall carefully consider all bids submitted and may consider relevant factors other than the pre-discount prices submitted by providers. 47 C.F.R. Section 54.511(a). Providers are required to charge entities the lowest corresponding price for services. The lowest corresponding price is the lowest price that a service provider charges to non-residential customers who are similarly situated to a particular school, library or library consortium for similar services. 47 C.F.R. Section 54.500(e). The Federal Communications Commission (FCC or Commission) has explained that in carefully considering all bids, the applicant must select the most cost effective bidder. *Report & Order In the Matter of Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, FCC 97-157, (May 8, 1997), para. 481.

The program rules also prescribe that the competitive bid requirements for the Schools and Libraries Universal Service Support Mechanism apply in addition to state and local competitive bid requirements and are not intended to preempt such state or local requirements. 47 C.F.R. Section 54.504.

Fund Administrator's Decision

The fund administrator has confirmed that the state and local process for competitive bid procurement was followed. The fund administrator will defer to the state and local competitive bid procurement review procedures and findings. ISIS 2000 has pursued recourse to appropriate state entities with oversight responsibility to assure compliance with procurement procedures. The fund administrator will not review anew the Protestant's claims that the ENA bid was not the most cost effective bid.

2. Is the TNDOE's payment of \$7,950,000 for the use of existing ConnectTEN routers and other internal connections equipment eligible for discounts during the first program funding year?

Description of Issue and Reference to Pertinent Rules

ISIS 2000 maintains that the \$7,950,000 payment is for internal connections that were purchased and installed prior to January 1, 1998. Under the ENA contract, ENA will purchase existing equipment owned by the Department, and also will install new equipment in the amount of \$9,750,000 over which ENA will provide services. *ISIS 2000 Objection*, p. 8. The TNDOE argues that the purchase of the network by ENA and subsequent leasing of those facilities as part of the provision of Internet access is the most cost effective means of providing service to the Tennessee schools. *Opposition of the Tennessee Department of Education*, pp. 11-14 (April 21, 1998).

ENA maintains that its purchase of the existing ConnectEN network is a sound business decision to assure that each school continues to receive a certain baseline level of service while ENA initiates network upgrades and introduces new, more efficient capabilities. ENA further distinguishes between the initial date of purchase of equipment that is used to provide services and the date that the services made available from the use of the equipment are provided. ENA further maintains that the actual charges to the Department are for Internet access service, and not for the sale of equipment. *Opposition of Education Networks of America*, pp. 16-17 (April 20, 1998).

The program rules prescribe that the fund administrator shall not approve funding for services received by a school or library before January 1, 1998. 47 C.F.R. Section 54.507(f). The fund administrator's Clients' Commonly Asked Questions - Set III dated February 24, 1998 further clarified in question and answer no. 1 that the fund administrator:

will not authorize the disbursement of discounts on facilities or services originally acquired or purchased prior to January 1, 1998. For example, if an eligible school or library originally purchased internal connections prior to January 1, 1998 and later refinanced the purchase sometime after January 1, 1998, the date of service delivery will be the original purchase or acquisition date, which in this example, is prior to January 1, 1998. Consequently, discounts on internal connections originally purchased prior to January 1, 1998 will not be funded by the Schools and Libraries Universal Service Program.

Fund Administrator's Decision

According to TNDOE, the services to be offered by ENA associated with the ConnectEN equipment are part of Internet access. The fund administrator does not agree and concludes that these facilities are network hardware that, depending on its location, may be considered either internal connections or wide area network components.

The costs in question are not eligible for discounts for three reasons. First, the purchase and installation of the facilities in question were made prior to January 1, 1998. Second, the purchase of components of a wide area network is not eligible for discounts under the Schools and Libraries Universal Service Support Mechanism. Both of these principles would have precluded

the funding of discounts for these costs had the TNDOE retained ownership of these facilities. Third, the rules which restrict discounts from being approved on services delivered or equipment purchased prior to January 1, 1998 cannot be avoided by virtue of transferring ownership of the facilities in question to ENA and providing for ENA's charging of these costs back to TNDOE as part of the costs of Internet access. This outcome is expressly described and rejected as ineligible for discounts in the Clients' Commonly Asked Questions, Set III, question and answer no. 1, as quoted above.²

Three FRNs are denied on this basis: FRN # 30708, #30710 and #30713. The PIA reason code is "Invalid eff. date of service." The funding commitment decision explanation is "The dollars requested were for service(s)/product(s) delivered outside of the current funding year." This is because the delivery date of the services is prior to January 1, 1998.

3. Are the charges for constructing Education Hub Sites eligible for discounts?

Description of Issue and Reference to Pertinent Rules

ENA's contract includes one time charges in the amount of \$1,850,000 for the construction of five points of presence, "Education Hub Sites," in each of the state's five LATAs in order to aggregate traffic from the 93 county seat aggregation points. ISIS 2000 argues that these costs are ineligible for discounts because they relate to the facility costs for a wide area network. *Objection of Integrated Systems and Internet Solutions*, pp. 21-22 (April 3, 1998).

The TNDOE states that the costs are eligible for discounts because the hubs are an integral part of Internet access service and are part of a gateway and do not involve the generation or alteration of content but rather protocol conversion and network management. *Opposition of the Tennessee State Department of Education*, pp. 14-15 (April 21, 1998). Also, the TNDOE maintains, the costs are part of a wide area network that is not to be built, purchased or owned by the State. Moreover, the components comprising the hubs are eligible internal connections. *Id.*

ENA describes the Education Hub Site costs as part of an upgrade of ENA's equipment to provide more reliable Internet access.

Each hub site will contain two large routers, one facing the Internet and one facing the ENA/BellSouth Connectionless Data Service "cloud." Sandwiched in between each router are a firewall, caching server, mail server and K-12 domain name servers. Each hub will provide virtual reserve desks, custom security, and e-mail access. They will store an average of 74 percent of the common web pages used by schools, which dramatically improves web page

² The fund administrator points to the Clients' Commonly Asked Questions as a point of information shared with the public on the fund administrator's implementation of the FCC program rules. This information was made available in January of 1998.

response time and greatly reduces direct Internet connections for web pages. The firewall feature will provide all K-12 schools with statewide protection from common Internet hacking attacks and provide optional content filtering that can meet any state or federally legislated filter mandates. The hubs also will provide more efficient routing of Internet access traffic and more secure, web-based e-mail capabilities.

Opposition of Education Networks of America, pp. 17-18 (April 20, 1998). ENA maintains that the costs associated with establishing these hubs are eligible because their installation is being undertaken to provide Internet access.

Fund Administrator's Decision

The hub components are not eligible for discounts as part of Internet access service. The costs are incurred to fund ENA's purchase and installation of hub facilities, not for Internet access service. While the installation of these hub facilities is for the purpose of providing Internet access, this purpose does not convert these facilities into Internet access service.

The facility costs may be considered internal connection costs if the hub facilities are located inside school building premises. If located outside of the building, the facilities would be wide area network components. These wide area network components are ineligible for discounts because purchased wide area network components are not eligible for support. The costs of installing and constructing wide area network facilities are not available for support from the Schools and Libraries Universal Service Support Mechanism.

The FRN impact of this decision will be discussed below.

4. Are the charges associated with ENA's installation of 100 caching servers eligible for discounts?

Description of Issue and Reference to Pertinent Rules

Included in the TND OE contract with ENA is a cost of \$1,500,000 for 100 caching servers that will be used to collect, update and store Internet content from World Wide Web Sites most popularly accessed by multiple PC users on a local area or wide area network. *Objection of Integrated Systems and Internet Solutions, Inc.*, p. 22 (April 3, 1998). ISIS 2000 maintains that this cost is for an ineligible component of internal connections. TND OE maintains that the caching servers are eligible because they are an integral part of Internet access service. *Opposition of Tennessee Department of Education*, p. 14 (April 21, 1998). ENA states that the caching servers perform a gateway function and are essential in order to provide efficient Internet access. Additionally, ENA claims, that the FCC expressly authorized the inclusion of servers such as the caching servers within the category of eligible internal connections.

The program rules define eligible internal connections as those components that are necessary to transport information all the way to individual classrooms. That is, if the service is an essential element in the transmission of information within the school or library, then the facility is eligible for discounts. See *Report and Order on Universal Service*, CC Docket No. 96-45, FCC 97-157, (May 8, 1997), para. 460.

Fund Administrator's Decision

The caching servers are not eligible internal connections components because the servers are not file servers that are necessary to transport information all the way to individual classrooms. While the installation of these facilities is for the purpose of providing Internet access, this purpose does not convert the classification of these facilities to Internet access service.

5. Are the charges associated with ENA's School Partners Program eligible for discounts?

Description of Issue and Reference to Pertinent Rules

ISIS 2000 claims that the ENA-TNDOE contract contains 8,000 hours of ineligible teacher training which will be provided by a full time team of eight consultants. ISIS 2000 estimates these costs to be \$1,200,000. *Objection of Integrated Systems and Internet Solutions, Inc.*, p. 23 (April 6, 1998). ENA maintains that these costs will be incurred for a program "aimed at maximizing the availability and quality of the Internet access provided by the ENA team." *Opposition of Education Networks of America*, p. 22 (April 20, 1998). There will be a field staff of eight individuals who will be responsible for monitoring 1800 points of Internet access throughout the state and for identifying problems in the field before they begin to impact the ENA Internet access system.

Teacher training is not eligible for discounts under the Schools and Libraries Universal Service Support Mechanism. *Frequently Asked Questions on Universal Service and the Snowe-Rockefeller Amendment*, DA 97-1374 (July 2, 1997), question and answer no. 9. Installation and maintenance of a basic internal connections network are eligible services. *Report and Order on Universal Service*, CC Docket No. 96-45, FCC 97-157 (May 8, 1997), para. 460.

Fund Administrator's Decision

These costs are being incurred to provide technical support and maintenance of the facilities in question. The eligibility of the School Partners costs will depend on the whether the facilities that are being maintained are eligible for discounts.

6. Are the charges associated with the ISDN circuits eligible for discounts?

Description of Issue and Reference to Pertinent Rules

ISIS 2000 objects to the inclusion of \$648,000 in recurring charges for ISDN circuits which have already been installed in each school as part of the existing ConnectEN initiative. *Objection of Integrated Systems and Internet Solutions, Inc.*, p. 24. ISIS 2000 maintains that the circuits were offered at a discounted price which was already discounted pursuant to a special state tariff, and that the Tennessee Regulatory Authority has ruled that the service is not eligible for reimbursement under the federal Universal Service Schools and Libraries Support Mechanism. *Id.* The TNDOE disputes ISIS' characterization of the Tennessee Regulatory Authority action and contends that the Authority approved the continued offering of the special tariff price for ISDN at the same time that the Authority adopted the federal discount matrix for the provision of intrastate service discounts. *Opposition of Tennessee Department of Education*, p. 16 (April 21, 1998); *See also Opposition of Education Networks of America*, p. 22 (April 20, 1998).

Fund Administrator's Decision

There is no basis for the fund administrator to conclude that the federal discount is not available for a specially priced state tariff telecommunications service, in the absence of being presented with dispositive evidence that the state regulatory commission intended for the federal discount to not apply to certain services. Moreover, the provision of ISDN circuits for the delivery of Internet access is recognized as the use of telecommunications services in the provisioning of Internet access. The charges for these transmission links are eligible components of Internet access service. *See* 47 C.F.R. Section 54.5, definition of Internet Access.

Implementation of Fund Administrator's Decisions on Issues # 3, 4, 5 FRN #s 30714, 30716, 30717, 30720, 30721, 30722 and 31803

All of the costs associated with Issues # 3, 4 and 5 are included as components of the charges comprising the following FRNs: #30714, 30716, #30717, #30720, #30721, #30722 and 31803. For each FRN, because the FRN included internal connections costs, (see Issue #s 3 and 4 above), the FRNs were reclassified as internal connections. This procedure, specifically identified by management in the course of audits undertaken by the U.S. General Accounting Office and independent auditors PricewaterhouseCoopers, was accepted as part of the SLD internal control design and reported to the FCC. This procedure was applied to each application that the fund administrator reviewed, to be sure that priority two services (internal connections) were not incorrectly classified as priority one services (telecommunications, dedicated and Internet access services). Because the discount level for each internal connections FRN in Application No. 18132 was below 70%, each FRN was denied on the basis that funding was not available to provide for internal connections requests at a discount level of 69% or below.

If each of the above-identified FRNs had not been denied on the basis of lack of funding for internal connections below 70%, then the specific ineligible services in each FRN would have been computed and deducted from each FRN. (See Issue #s 3, 4 and 5 above). If the remaining amount of eligible services was more than 50% of each entire FRN, then the eligible costs of each FRN would have been approved. If the remaining amount of eligible services was 50% or less of the entire FRN, then each FRN would have been denied in total, in accordance with the fund administrator's procedures.

**Alternative Rationale for Fund Administrator's Decision on Issue #2
FRN #s 30708, #30710 and #30713**

Since the costs comprising these FRNs include internal connections, these FRNs would have been reclassified as internal connections. As the discount percentage for each FRN is below 70%, funding for these FRNs would have been denied on the basis that no funds were available on the basis that funding was not available to provide for internal connections requests at a discount level of 69% or below.

ATTACHMENT 2

**STATE OF TENNESSEE
FCC FORM 471 APPLICATION**

**Schools and Libraries Universal Service
Services Ordered and Certification Form**

Estimated Average Burden Hours Per Response: 6 hours

This form asks schools and libraries to list the eligible telecommunications-related services they have ordered and estimate the annual charges for them so that the Schools and Libraries Corporation can set aside sufficient support to reimburse providers for services.

Please read instructions before completing.

(To be completed by each Billed Entity)

Block 1: Applicant Address and Identifications (School, library, or consortium desiring Universal Services funding.)

1. Name of Applicant (Billed Entity) Tennessee State Department of Education		2. Funding Year 1998	
3a. NCES School Code (if individual school) or NCES Library Code (if individual library)		470000000000	
3b. 471 Application Number (Administrator will insert this)		3c. Billed Entity Number	
4a. Type of Applicant (Check only one box) <input type="checkbox"/> school <input type="checkbox"/> school district <input type="checkbox"/> library or library consortium under the LSTA <input checked="" type="checkbox"/> consortium of multiple entities			
4b. If applicant is a consortium, check all other boxes that apply: <input type="checkbox"/> includes non-governmental entities ineligible for support <input type="checkbox"/> region of a state <input checked="" type="checkbox"/> statewide <input type="checkbox"/> multi-state <input checked="" type="checkbox"/> state educational agency <input type="checkbox"/> local educational agency <input type="checkbox"/> educational service agency			
5. Applicant's Street Address, P.O. Box, or Route Number 710 James Robertson Parkway, 6th Floor			
City Nashville	State TN	Zip Code 37243-0381	Telephone Number 615-532-1229
E-mail Address shragoj@ten-nash.ten.k12.tn.us			
6. Contact Person's Name Jacqueline B. Shrago			
Street Address, P.O. Box, or Route Number (if different from Item 5) 710 James Robertson Parkway, 6th Floor			
City Nashville	State TN	Zip Code 37243-0381	
Fill in all of the following (if available), and check the preferred mode of contact: Telephone <u>615-532-1229</u>			
<input type="checkbox"/> FAX <u>615-532-4791</u> <input checked="" type="checkbox"/> E-mail <u>shragoj@ten-nash.ten.k12.tn.us</u> <input type="checkbox"/> Mail			

Block 2: Purpose of Request

7. Purpose of Request: (Check all that apply, if any.)
a. <input type="checkbox"/> Discount on contract(s) signed prior to a request being posted on the Administrator's website. Was an FCC Form 470 filed with regard to all the contract(s)? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
b. <input checked="" type="checkbox"/> Discount on contract(s) signed after a request being posted on the Administrator's website.
c. <input type="checkbox"/> Minor modifications or supplement to existing contract(s) for which a Form 471 was already filed 471 Application Number _____

Block 3: Characteristics of Applicant and Applicant's Service Order (derived from FCC Form 470 Blocks 2 & 3)

8a. Number of students 829,303	8b. Number of library patrons
9. Number of buildings to be served 1747	10. Number of rooms to be served 32094

Contact Person's Name Jacqueline B. Shragerand Phone Number: 615-532-1229

	Existing Services	Total Services After Order
11. Telecommunications Services		
a. Number of phones that have or require service (See instructions concerning extension phones and fax machines.)		
b. Number of computers that have or require services	50000	60000
c. Number of high bandwidth video conferencing links		
12. Internal Connections		
a. Number of buildings with at least some rooms connected		
b. Number of rooms connected		
c. Highest speed of connection		
13. Internet Access		
a. Number of dial up connections	0	0
b. Highest speed of such dial up connections	0	0
c. Number of direct connections	1747	1747
d. Highest speed of such direct connections	T1	T1

Block 4: Determining Discount Percentages

14. Fill in one line per school, library, or library consortium and calculate in the last line, an average discount rate for the billed entity. Attach additional pages if necessary. Note: If the applicant has already completed this chart for all of the same entities with data that is current, provide the "471 Application Number" (Item 3b), from that previous FCC Form 471 here: _____

(1) Name of Individual School or Library	(2) NCES Comparable Code for School or Library (Obtain from Administrator)	(3) Urban or Rural	(4) <i>For Schools:</i> Number of Students <i>For Libraries:</i> NCES Code of a School in its District	(5) <i>For Schools:</i> Number of Students Eligible for National School Lunch Program	(6) Discount Calculated from Discount Matrix	(7) Check if School or Library will use "Shared Services" listed in Item 15.
